COMFORT GLOW INTRODUCES NEWCASTLE CAST IRON STOVES:

Available in three finishes, these stoves enhance décor while economically reducing central heating bills

BOWLING GREEN, KY (December, 2004)- Heating a home during the winter is an expensive, yet imperative necessity. In addition, furnishing a home can be equally costly, in keeping up with trends. **Comfort Glow** is proud to combine two important home matters, economy and décor, by introducing their new line of **Newcastle Cast Iron Stoves**. Patterned after an American Style stove popular in the early to mid 1800's, this line of stoves provide a welcoming ambience and conversation piece for guests, while a lowered heating bill is an added benefit for homeowners!

Comfort Glow's Newcastle Cast Iron Stove Heaters afford the economy, convenience, comfort and efficiency of a gas space heater by allowing homeowners to lower the thermostat an average of five degrees while the heater is in use. By reducing the operating cost of central heating, these stoves can save homeowners 10% on their heating bills. Comfort Glow gas heaters provide a clean heat emission with no added clean up from messy wood!

Designed to enhance a room and provide a focal point, the **Newcastle Cast Iron Stove Heaters** are available in three versatile finishes: painted black, porcelain black and porcelain ivory. The **Newcastle Stoves** offer an optional open front viewing door, allowing the fire to be exposed. In addition, a control door conceals operating controls, so only the beauty of the stove, yellow flames and logs are visible. All vent-free burners are offered in natural gas or propane. The direct-vent system ships in natural gas with a propane conversion kit included.

Designed with an installed burner to accommodate any room with access to a gas line, **Comfort Glow's** new line of **Newcastle Cast Iron Stoves** are available in two venting options:

- I. **Vent-Free:** This burner system delivers up to 30,000 Btu of clean, quiet and odorless heat, warming up to 1000 square feet, needing no venting, therefore, no heat loss.
- II. **Direct-Vent:** (Only available in a painted black finish) The flames in this system burn in a sealed firebox with the stove drawing outside room air to the fire for combustion.

Retailing between \$579 and \$1,049, the stoves are available at most major home centers and hardware chains. In addition to the Newcastle Cast Iron Stove Heaters, **Comfort Glow** also markets many other styles of stoves, heaters, fireplace systems and logs to accommodate every heating need.

Comfort Glow is a brand name of **DESA Heating LLC**, a growth-oriented, manufacturer and leading marketer of zone heating home comfort products for the consumer and professional markets in the U.S., Canada, and abroad.
